PRESS RELEASE

RELATECH WEBINAR

"FIND OUT HOW TO PREDICT POSSIBLE ANOMALIES IN PRODUCTION PROCESSES"

29 SEPTEMBER AT 12:00 - 12:40 p.m.

Milan, 28th September 2020

Relatech S.p.A., *Digital Enabler Solution Knowledge (D.E.S.K.) Company* and innovative SME listed on AIM Italia market (Ticker: RLT), announces that, that on 29 September 2020 from 12:00 to 12:40 will hold the live webinar *"Find out how to predict possible anomalies in production processes"*, organized with the support of IBM.

During the webinar, **Silvio Cosoleto**, Vice President of Sales Relatech and **Angelo Aloia**, Innovation Manager Relatech, will present the **ReFab4.0** solution particularly oriented to the issue of **Predictive Maintenance** of production systems and processes, available on the **IBM Cloud** infrastructure.

Relatech, IBM Business Partner, has for years been engaged in the Research & Development of innovative digital solutions that take the form of the evolution of its own digital and Cloud-based platform **RePlatform**, the heart of the business offer and through which the company offers services and solutions innovative digital products to the market.

Based on RePlatform, Relatech recently released the **ReFab4.0** verticalization which, thanks to the use of **IoT** tools and **Advanced Analytics** based on **Artificial Intelligence** algorithms, allows to monitor in real time the operating parameters of machinery and production processes
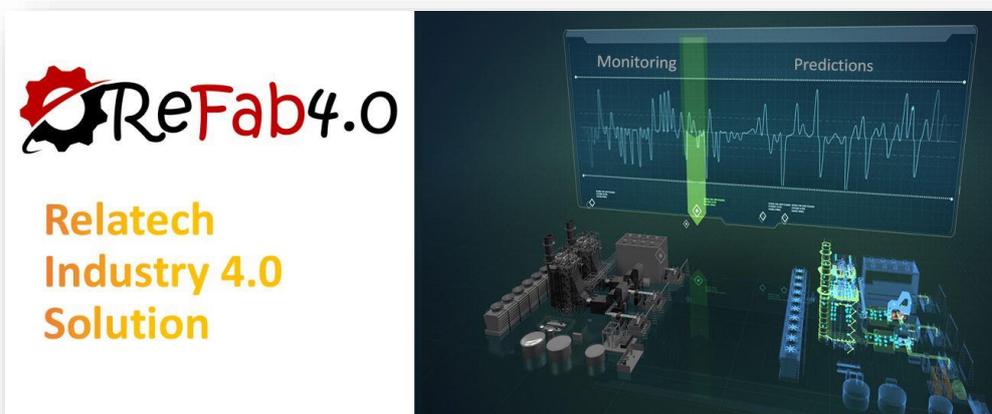

and at the same time developing predictive analyzes based on **_Machine Learning_** algorithms to promptly predict and prevent possible malfunctions. Furthermore, thanks to the use of _Augmented Reality_ tools, the solution gives the possibility to create a _Digital Twin_ of the machinery and to develop guided multimedia procedures to support maintenance interventions.

Silvio Cosoleto, Vice President of Sales, comments: "_According to IDC estimates, the IoT market in the world is expected to grow with a CAGR of 25% until 2024, with investment volumes that will exceed $ 700B, thus establishing itself as one of the fastest growing sectors of the entire digital technology sector (Digital Enablers). But IoT and Industry 4.0 applications in general are certainly also among the major Big Data generators and therefore require platforms equipped with structured architectures for the acquisition and management of such quantities of data and advanced analytical capabilities capable of process and extract information relevant to associated business processes. It is now clear that the need of every company, including SMEs, to adopt these technologies as part of digital transformation programs, is no longer an option but a must on which the very survival of the company may depend. It is precisely from this awareness that we have developed ReFab4.0, a vertical solution for the Industry4.0 world that derives from our digital and cloud-based platform RePlatform. "_

During the Webinar, the main features and functionalities of the solution and the benefits it can offer to client companies will be illustrated, also through a live demo of a use case.
