

PRESS RELEASE

RELATECH: PARTICIPATION IN SMAU MILANO 2020, EVENT DEDICATED TO OPEN INNOVATION

Relatech will hold an in-depth workshop on Digital Enabler Technologies

"Assisting customers in the era of COVID-19"

Milan, 20th October 2020

Relatech S.p.A., *Digital Enabler Solution Knowledge (D.E.S.K.) Company* and innovative SME listed on AIM Italia market (Ticker: RLT), announces that, announces that today he will hold a workshop "Assisting customers in the era of Covid-19" at the [SMAU Milano 2020](#) event.

SMAU Milan, founded on the Open Innovation leitmotif "*Be Creative. Be innovative. Be Open*", is the reference event for all companies that want to start product and process development activities to bring true **innovation** to the market.

Angelo Aloia, Innovation Manager Relatech, will hold a workshop today at 13:30 entitled "*Assisting customers in the era of COVID-19*". During the workshop, the two speakers will deepen the modern frontier technologies Digital Enabler, such as **Augmented, Virtual & Mixed Reality, Cloud** and **Machine Learning** to support *predictive maintenance* and *remote assistance*.

Angelo Aloia will present Relatech proprietary solution, **ReFaB4.0**, dedicated to the topic of **Industry 4.0** for monitoring systems and production processes. The **ReFab4.0** solution, verticalization of the **digital** and **cloud-based** platform **RePlatform**, the heart of the Relatech commercial offer, allows you to monitor the operating parameters of machinery and production processes in real-time thanks to the use of IoT tools and to process analyzes advanced based on **Machine Learning** algorithms to prevent possible malfunctions. Furthermore, thanks to the use of **Augmented Reality** tools, the solution can create a **Digital Twin** (Digital Twin) of the machinery and develop guided multimedia procedures to support maintenance interventions.

The main features of the solution are:

- **Real Time Monitoring:** Real Time monitoring of processes and devices;
- **Advanced Analytics:** identification of anomalies and possible failures through Machine Learning algorithms;
- **AR/VR Maintenance Support:** through Augmented and Virtual Reality tools, “3D digital twins” models of machinery are created, enriched with multimedia information for monitoring, support for routine maintenance and remote maintenance;
- **Edge & Cloud architecture,** which combines the acquisition and processing of data in real time near the equipment, with the scalability and computing power made available by the Cloud.
