

PRESS RELEASE

THE RELATECH GROUP WITH MEDIATECH WINS THE TENDER IN THE FIELD OF CYBERSECURITY

ORDERED BY MILANO SERRAVALLE - MILANO TANGENZIALI SPA

Milan, 6Th July 2021

Relatech S.p.A., *Digital Enabler Solution Knowledge (D.E.S.K.) Company* and innovative SME listed on AIM Italia market (Ticker: RLT), announces that its subsidiary Mediatech has been awarded the tender called by Milano Serravalle - Milano Tangenziale S.p.A. for the supply of the Cynet 360 platform for the year 2021/2022 and the related technical support assistance.

The project consists in the supply of cybersecurity services provided by Mediatech as a technological partner of Cynet, a world leader in autonomous breach protection systems that consolidates and automates monitoring and control, attack prevention and detection and response orchestration. The solution offered by Mediatech will allow the company, the concessionaire of various motorway sections in Northern Italy, to protect its network infrastructure.

The Relatech Group will share its expertise in cybersecurity by exploiting the potential of the ReSec module of the digital and cloud based platform RePlatform, a set of technologies, specifically *Digital Enabler Technologies*; skills and methodologies.

Silvio Cosoleto, Chief Operating Officer of Relatech and **Giuseppe Dominoni AD of Mediatech**: *"The award of this tender testifies the consolidation of Mediatech's role as a reference player for skills and services offered in the cybersecurity scenario of the Italian market. In recent years, greater awareness has been created on the risks associated with cyber crime. As a result, data security has now become a major concern for most companies, both public and private. Companies are progressively increasing investments to raise security levels and to build an effective protection strategy that is able to align cyber security requirements with business objectives. The Relatech Group, relying on the ReSec module of its RePlatform platform, is moving quickly to offer a single solution in terms of IT security, centralizing all company information in a single space to analyze it and, in the event of a threat, intervene by blocking the cyber attack and activating disaster recovery plans."*
